

ON/OFF ROAD MOTORCYCLES | SCOOTERS | ATVS/UTVS | SORE ENGINES

Experience * Knowledge * Integrity

Services Provided –

- US EPA and CARB (California) Certification Testing
- Exhaust emissions testing with HC, CO, NO_x, CO₂ and NMHC (CH₄) emission measurements and fuel economy
- Evaporative emissions (SHED) testing
- Service accumulation (durability) conducted in accordance with 40 CFR Part 86.426-78
- Aftermarket Device Executive Order Testing (CARB E.O. Testing)
- Confirmatory Testing
- Production Line Testing (PLT)
- Product Development/Proof Testing/R&D Testing
- Engine Dynamometer Testing Including for SORE Engines
- All major driving cycles can be conducted

**EPA and CARB Recognized
ISO 9001:2008 Registered**

Olson-EcoLogic Engine Testing Laboratories is an independent, state-of-the art emission testing facility capable of accommodating a wide spectrum of engines and vehicles. The Quality Management System is registered as ISO 9001:2008 conformant and the lab has received compliance recognition from the California Air Resources Board (CARB), the United States Environmental Protection Agency (EPA) and the Texas Commission for Environmental Quality (TCEQ).

Located in Fullerton, California, the laboratory is ideally situated to meet the growing demand for CARB and EPA certification, verification, exemption, and compliance testing standards.

The staff has over 100 years of combined environmental testing experience. Olson-EcoLogic provides the capabilities for advanced research, engineering as well as testing of various aftermarket products and new technologies. All emission testing is conducted in accordance with the applicable CFR and CARB regulations.
